

LET'S TALK / PERFORMANCE

aliancys
QUALITY RESINS

EXTRAORDINARY PROPERTIES

TOGETHER WE CAN MOLD ANYTHING WE WANT INTO ANY FORM OR VOLUME. WE CAN BRIDGE GAPS, RESIST NATURE AND SAVE ENERGY. WE CAN LITERALLY SHAPE OUR WORLD.

TOGETHER WE CAN MAKE PRODUCTS WITH EXTRAORDINARY PROPERTIES. WE MAKE THINGS TOUGHER, LIGHTER, STIFFER, SMOOTHER, AND MORE COMPETITIVE. FROM BRIDGES TO CARS, FROM WATER PROCESSING TO WIND TURBINES.

LET'S TALK / QUALITY

QUALITY FOR BUSINESS SUCCESS

Manufacturing high quality composite components is a prerequisite for your business success. Therefore, you need a robust production process in combination with consistent and reliable input materials. You require resins that meet your specifications day after day, resulting in consistent part performance and a predictable volume output even in a large production series. Delivering peace-of-mind in your production process. Minimizing process variation will also help you to reduce safety factors in design, which translate into weight savings and reduced cost.

BUILDING ON TRUST

Building on a 50 year track record of supplying composite resins, Aliancys can provide you with products of high quality consistency so you know your parts perform in the right way. Rather than fixing challenges in your operations, you can focus on your own business, keeping your hands free to build trust with your customers.

TOGETHER WE CAN FIGURE OUT
ANY CHALLENGE. WE LIKE TO
INVOLVE OUR PROBLEM-SOLVING
CAPABILITIES. TO BUILD VALUABLE
TRUSTWORTHY PARTNERSHIPS,
NOW AND IN THE FUTURE.

LET'S TALK / SPEED

TRUSTWORTHY PARTNERSHIPS

OPERATIONAL AGILITY

You need flexibility from your supplier to meet the evolving needs of your customers. Whenever you have special demands or if unexpected problems arise, you want fast support in adopting products or keeping your production running. While processes run smoothly, continuous product and process improvement will help create value and improve your competitiveness.

ENGAGE PROFESSIONALS

Aliancys wants to fully understand your business and works closely together with you to meet the requirements of your customers. Besides providing you with low hassle and great service, we optimize the quality and output of your processes. Our technical service team and great material testing capabilities help you to enhance composite part performance and will support you in mitigating eventual process interruptions. So you can be sure to deliver to your customers the components they need, in the quantities they need.

DELIVERING INNOVATION

Creating composite components that are stronger, lighter and more beautiful is our common goal, replacing traditional materials like steel, aluminum, and concrete. While making composites work in new applications, you want your parts to perform in a predictable way. This requires thinking out-of-the-box and creating unconventional material solutions. You need a partner that has the right knowledge and track record with composites, who has a strong drive to deliver a solution that works.

TOGETHER WE CREATE

Aliancys can help you to push the limits of composite part performance and component manufacturing. Taking an integral approach to new product development, we use our full expertise in quality resins, material science, and composite component manufacturing in order to shape new composites applications. Through building strong relations in the supply chain, we help you to explain composites benefits to key decision makers. We know that co-creation and information sharing help to significantly reduce time-to-market. So let's talk performance and help you to increase your competitive advantage and business success.

A modern speedboat with a dark green hull and a white deck is shown from a low angle, moving across the water. The boat's sleek design and metallic railings are visible. The background is a vast, calm blue sea under a clear sky.

CREATE THE UNTHINKABLE

TOGETHER WE CAN EVEN CREATE
PRODUCTS THAT NEVER EXISTED.
YET. FOR MORE THAN FIFTY YEARS
WE HAVE FOUND WAYS TO
OUTSMART THE IMPOSSIBLE.
TO CREATE THE UNTHINKABLE.
TO BUILD THE UNBUILDABLE.
